## About Me

Frontend developer with end-to-end ownership of production admin dashboards and client-facing platforms. Combines strong execution speed with product instincts from leading finance and community operations, plus a QA-minded eye for edge cases that keeps shipped features stable.

## Skills

**Languages:** JavaScript, TypeScript, Python, Markdown, YAML

**Frameworks & Libraries:** Next.js, Node.js, Hono.js, React, Astro, Tailwind CSS, Drizzle, Prisma, Tanstack

**Databases:** PostgreSQL, Supabase, Firebase, Upstash Redis

**Product & QA:** Requirements scoping, prioritization, stakeholder communication, manual test case design, regression testing, bug triage

**Tools & Platforms:** Vite, HoppScotch, Figma, GitHub Actions, Vercel, Netlify, Render, Cloudflare, GitHub, Twilio

**General Skills:** Leadership, Collaboration, Communication, Problem Solving, Mentoring, Adaptability

**Hardware:** Arduino, Raspberry Pi

## Experience

**Frontend Engineer**, Foodo AI — Jan 2026 - Present

- Own the restaurant admin dashboard end-to-end, leading its full revamp and ongoing feature work.
- Contributed to gift card and table booking dashboards, including API integration and performance fixes.
- Built 8-10 client websites and fixed bugs/improved performance across many existing sites.

**Frontend Engineer**, MetaLoom — Jul 2025 - Dec 2025

- Sole engineer on a freelance engagement — owned architecture, implementation, and deployment end-to-end.
- Worked directly with the client to scope features and iterate on design and usability.

**Community Management Intern**, Tinkerhub — Dec 2024 - May 2025

- Prioritized community activity roadmap based on member feedback, coordinating across multiple volunteer teams.
- Planned and ran engagement programs to grow active community participation.

## Education

**B.Tech in Electrical and Electronics Engineering**, St. Joseph's College of Engineering and Technology, Palai — 2021 - 2025

## Projects

**EleGuard** — View Project

- Developed the software side of EleGuard, focusing on detection logic and automated alerts.

**MuLearn Dashboard** — View Project

- Rebuilt the MuLearn dashboard from the ground up alongside role-aware home pages, Company and Mentor portals, task management, analytics, and MuJourney, with hardened cookie-based edge-protected auth and server-side rendering.

**MuLearn Home** — View Project

- Led the front-end migration and implementation process, optimizing the user interface and improving responsiveness across MuLearn Home page.
